- # As of October 31, 2020, the Fund had a significant portion of its assets invested in the Consumer Discretionary and Health Care sectors. Companies in the Consumer Discretionary sector may be greatly impacted by changes in domestic and international economies, interest rates, competition, consumer confidence, consumer spending, government regulations, marketing, and supply and demand. Companies in the Health Care sector are subject to risks such as litigation, intellectual property issues, competition, government regulation, product approval or rejection and product obsolecense.
- ^ The Money Market Deposit Account ("MMDA") is a short-term investment vehicle in which the Funds holds cash balances. The MMDA will bear interest at a variable rate that is determined based on market conditions and may change daily and by any amount. The rate shown is as of October 31, 2020

The Global Industry Classification Standard ("GICS®") was developed by and/or is the exclusive property of MSCI, Inc. ("MSCI") and Standard & Poor Financial Services LLC ("S&P"). GICS is a service mark of MSCI and S&P and has been licensed for use.

Summary of Fair Value Exposure

The Fund has adopted authoritative fair value accounting standards which establish an authoritative definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value, a discussion in changes in valuation techniques and related inputs during the period and expanded disclosure of valuation Levels for major security types. These inputs are summarized in the three broad Levels listed below:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.
- Level 3 Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's securities as of October 31, 2020:

	 Level 1 Level 2	Level 3	Total
Common Stocks	\$ 4,081,247 \$ - \$	- \$	4,081,247
Short-Term Investment	241,701 –	_	241,701
Total Investments in Securities	\$ 4,322,948 \$ - \$	- \$	4,322,948

Refer to the Schedule of Investments for further information on the classification of investments.
